

### 1.How to display images in title bar?

:Most websites add an icon or image logo in the title bar. This icon logo is also called a favicon and can be useful for user engagement.

A favicon, is also known as a URL icon, a tab icon, a shortcut icon, a website icon, or a bookmark icon, is a file containing one or more small icons associated with a particular website or web page.

```
<!DOCTYPE html>
```

```
<html>
```

```
  <head>
```

```
    <title>Title of the document</title>
```

```
    <link rel="icon" type="images/x-icon" href="https://www.w3docs.com/favicon.ico"/>
```

```
  </head>
```

### 2.What is the purpose of “alt” attribute of img tag?

:The “alt” attribute is used to specify an alternate text for the image, if a user for some reason cannot view it (because of slow connection, an error in the src attribute, or if the user case uses a screen reader.)

```

```

### 3.Why do we use tbody, thead, tfoot tags?

: tbody tag is used to group the body content in an HTML table.

thead tag is used to group header content in an HTML table.

tfoot tag is used to group footer content in an HTML table.
